

The fontawesome package

High quality web icons

Xavier Danaux*^{([L](#)) \TeX code}
Dave Gandy[†](font design)

Version 4.4.0, released on July 30, 2015

Abstract

The `fontawesome` package grants access to 585 web-related icons provided by the included *Font Awesome* font, designed by Dave Gandy and released under the open SIL Open Font License.

This package works both with $\text{X}_{\text{H}}\text{(L)}\text{\TeX}$ and $\text{Lua(L)}\text{\TeX}$ (using `fontspec` to load the included original otf font), as well as $\text{(pdf)(L)}\text{\TeX}$ (using an included `type1` conversion and character mapping of the font).

1 Introduction

The `fontawesome` package aims to enable easy access in $\text{(L)}\text{\TeX}$ to high quality icons covering web application, transportation, gender, file type, spinner, form control, payment, chart, currency, text editor, directional, video player, brand and medical pictograms. It is a redistribution of the free (as in beer) *Font Awesome* font with specific bindings for $\text{(L)}\text{\TeX}$.

2 Requirements

The `fontawesome` package requires the `fontspec` package when using the $\text{X}_{\text{H}}\text{(L)}\text{\TeX}$ or $\text{Lua(L)}\text{\TeX}$ engines to load the included otf font. When using the $\text{(pdf)(L)}\text{\TeX}$ engine, the `fontawesome` package doesn't require any external package.

*URL: github.com/xdanaux/fontawesome-latex; Licence: [LaTeX Project Public License, version 1.3c](#); E-mail: xdanaux@gmail.com.

[†]URL: fontawesome.io; Licence: [SIL Open Font License, version 1.1](#).

3 Usage

`\faicon` Once the fontawesome package loaded, icons can be accessed through the general `\faicon`, which takes as mandatory argument the *<name>* of the desired icon, or through a direct command specific to each icon. The full list of icon designs, names and direct commands are showcased next.

3.1 Web application icons

Icon	Name	Direct command
	<i>500px</i>	<code>\fa500Px</code>
	<i>adjust</i>	<code>\faAdjust</code>
	<i>adn</i>	<code>\faAdn</code>
	<i>align-center</i>	<code>\faAlignCenter</code>
